Attached are some quick comments/thoughts for discussion during our conference call. Sorry I meant to get this to you sooner. Actually worked late to finish material on a reg review, draft model to send out, another site dispute material, and a draft ROD. So I thought I would focus on this all day, and my access to email was blocked until 4:30. You can't make this crap up.

**Subject:** RE: Hunters Point RESRAD BUILD/BPRG comparison

Hi Wayne, what about "USACE approach was ~~not to try to find fault with the USDON approach but rather~~ to assist USEPA in understanding key modeling differences"

I think that's a more neutral way of describing the ACE evaluation.

Sometimes the difference in models may be a fault (unfortunately mistakes are made in programming), sometimes the differences may be policy based (EPA protecting RME individuals since that is in the NCP, NRC and DOE protecting average member because that is in NRC D&D rule and DOE Orders).

**Subject:** RE: Hunters Point RESRAD BUILD/BPRG comparison

Dave –

I don't have any substantive comments on the partial draft, but a couple of suggestions on wording in the section describing your approach (section 2.1).

- Suggest modify sentence as follows: "Understanding the differences between the models should facilitate ~~USEPA acceptance of~~ is expected to assist USEPA in determining whether it can support the USDON modeled approach at HPNS." [I don't want the report to incorrectly imply that EPA will accept the Navy approach no matter the outcome of the evaluation]

- Suggest deleting the sentence: "USACE approach was not to try to find fault with the USDON approach but rather to assist USEPA in understanding key modeling differences" [I expect that the report will be a public document and do not want to incorrectly suggest that USACE would not identify faults in the Navy's approach if warranted.]

I look forward to receiving your report next week.

I've probably said this before but will restate it anyway. I see the report as giving EPA information we need to choose from several options: 1) agree that the current Remediation Goals (RGs) are acceptable based on the calculated risks; 2) agree that the current RGs are acceptable based on calculated risks if certain conditions are met (e.g., future sampling demonstrating that ceiling and upper walls are not contaminated and removable fraction is less than some specified value); 3) conclude that one or more RGs are not protective and need to be lowered. And if we go with options 1 or 2 and use RESRAD BUILD as a basis for some or all of the risk estimates used to support our decision, we need to justify its use.

Thanks.

All, BLUF, I would like to have our call today but short to not waste your time. The attached report is maybe a 40% document. I sincerely apologize for that, been putting out fires on too many fronts past few weeks. What I would like to do is ask you each to not waste any time reading it but take 10 min to look at sections and example content and let me know if this is on track or way off base on our call.

I would like to get this completed for concurrent review on Tuesday morning, if that works? I know this has dragged on too long and want to get it done. Completely on me, and not how I like to or normally do things.

Dave

Dave –

Understood. Unless Stuart still wants to have a call this week let's reschedule for next week. Is it doable to get us a report by Tuesday, with a call on Wednesday?

Wayne and Stuart, I apologize, but our report is not going to be ready this week. I recommend we postpone another week, but if you would like to talk tomorrow we still can. I hate to blame it on COVID but it is what it is. FYI: Jon has had issues with connection and computer. I have been working shutting down our Maywood Site due to a positive COVID case. As such, I have not been able to work on the report the past week.

My calendar is clearing given the site shut down. So I do believe another week is sufficient.

Dave, Julie, and Jon –

Thanks for the update. We're all facing challenges in trying to keep the work moving.

The plan is still to get Stuart and me a draft report and follow up with a call? If so, is it doable to get us the draft report Monday or Tuesday, and plan for a call Wednesday or Thursday of next week?
